TARIFF FORMAT

- A. Page Numbering** - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 14 and 15 would be 14.1.
- B. Page Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th revised Page 14 cancels the 3rd revised Page 14. Because of the various suspension periods and deferrals the Commission follows in its tariff approval process, the most current page number on file with the Commission is not always the tariff page in effect. Consult the check sheet for the page currently in effect.
- C. Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2
 - 2.1
 - 2.1.1
 - 2.1.1.A
 - 2.1.1.A.1
 - 2.1.1.A.1.(a)
 - 2.1.1.A.1.(a).I
 - 2.1.1.A.1.(a).I.(i)
 - 2.1.1.A.1.(a).I.(i).(1)
- D. Check Sheets** - When a tariff filing is made with the Commission an updated check sheet accompanies the filing. The check sheet lists the pages contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There shall be no other symbols used on this page if these are the only changes made to it. The tariff user should refer to the latest check sheet to find out if a particular page is the most current on file with the Commission.

EXPLANATION OF SYMBOLS

Changes to this tariff shall be identified on the revised page(s) through the use of symbols. The following are the only symbols used for the purposes indicated below:

- (C) - To signify a changed regulation.
- (D) - To signify a discontinued rate or regulation.
- (I) - To signify an increase in rate or charge.
- (M) - To signify material relocated from one page to another without change.
- (N) - To signify a new rate or regulation.
- (R) - To signify a reduced rate or charge.
- (S) - To signify a correction or reissued matter.
- (T) - To signify a change in text but no change in rate or regulation.

(T)

This new plan is an add-on to the interstate filing of the Calling Card Flat Rate Plan in Carrier's FCC Tariff No. 1. The Calling Card Flat Rate Plan is available to residential Customers. This plan allows Customers to originate outbound, direct dialed long distance calls via a toll free number. Customers will be billed a flat per minute rate for each call originating and terminating within the mainland U.S., Alaska, Hawaii, Puerto Rico, U.S. Virgin Islands and Guam. International calls will be rated at International Message Telecommunications Service rates. A payphone surcharge will be assessed, where applicable, on all calls made from a public payphone including each pound (#) reorigination completed call. By pressing the pound (#) key, Customer is able to terminate one call while remaining connected to the calling card platform in order to originate additional calls without redialing the toll free number. Conference calling, which allows Customers to add more than one person to a specific call, is available. The originator of the conference call will be billed each conference call leg in addition to the rate per minute for each leg of the call. Conversation minutes, reflecting usage sensitive charges, are billed in increments of one minute following the initial minimum billing period of one minute. Charges are rounded to the next higher minute for billing purposes. As an option to Customer, Carrier will offer the Calling Card Flat Rate Plan for billing on the Verizon VISA credit card or to any other credit card that is acceptable to Carrier. It will be the obligation of credit card Customers to meet the terms and conditions set forth by the credit card company.

Rates are found in Section 4.3.1.

The connection to the called telephone will not be made until the total value of the coins deposited into the payphone satisfies the specified charges.
- Prior to the completion of the initial four-minute period, Carrier's call processing system or Carrier Operator will announce the amount of call time remaining and specify the charges to be paid for additional time period. If no additional coins are deposited into the payphone or if the total value of coins that are deposited into the payphone do not satisfy the specified charges for the additional period, the call will be terminated upon completion of the initial four-minute period.
- Duration of each call is recorded for an initial four-minute period, and each additional one-minute period. A fractional period of less than four minutes is rounded up to equal a whole four-minute period.
- Usage rates apply to each additional one-minute period after the initial four-minute period.
- Usage rates and service charge apply 24 hours a day, seven days a week.
- Usage rates are applied for each four-minute period or fraction thereof. 6.2 Operator Services - Payphone**6.2.1 General**

Operator Services - Payphone allows calls to be placed from payphones pre-subscribed to Carrier with the assistance of an automated or live operator. Calls are billed in increments of one minute. Such charges are rounded to the next higher increment for billing purposes. A one-time Operator Surcharge, if applicable, will be added to the first minute of each operator-assisted call in addition to per minute rates as specified in 6.2.4.

The following types of calls are available for operator assistance:

- **Collect Calls** - Operator assistance for collect calls will ask the caller to provide his/her name or other identification, then contact the party at the domestic telephone number specified by the caller, repeat the caller's identification and then ask if the called party will accept charges for the call. If the called party agrees to accept the charges, the call will be established and the associated charges for a collect call will be billed to the called party's residential telephone number billing account. Collect calls can be either person-to-person or station-to-station.
- **Billed-to-Third Number** - Operator assistance will establish the call requested by the caller and arrange for billing of associated charges to a residential domestic telephone number specified by the caller that is other than the calling telephone number or the called telephone number. Requests for third number billing are subject to operator verification that the party at the telephone number to be billed will accept charges for the call. Other efforts may be undertaken subsequently by Carrier, as necessary, to determine responsibility for payment of such calls.
- **Person-to-Person** - At the caller's request, operator assistance will attempt to place a call to a particular party at a domestic telephone number specified by the caller. The party specified by the caller may be a person, station, department, extension, or office. If successful, the Operator will establish the person-to-person call between the calling and called parties. If the identified party is not available and the caller requests, or agrees, to speak to a party other than the party initially specified, the call will be established and billed at the person-to-person call rates.
- **Operator Dialed Direct** - Operator assistance is available to callers who want an Operator to place their call for them. Operator dialed direct calls do not include: collect calls, billed-to-third number calls, person-to-person calls or calls billing to a calling card or commercial credit card.

SECTION 6 - MISCELLANEOUS SERVICES (Continued)**6.4 Long Distance Dialer Calling Plan****6.4.1 Description of Service****A. General**

This service is no longer available to new Customers (N)

This service allows residential and business Customers to originate outbound long distance calls by automatically bypassing Customer's current long distance service provider using a Customer Premise Equipment (CPE) device called the long distance dialer. This service provides Customer with the ability to make intrastate intraLATA and intrastate interLATA long distance calls and does not affect Customers local calling service or any local calling features; nor does it affect inbound long distance calls. Customer is required to pay for the service in advance by using a credit card or purchasing a plan at a retail location.

If Customer uses a credit card, Customer must go to a web site or call a toll free number to register the dialer and select the desired calling plan.

The long distance dialer and calling plans can initially be purchased at various retail locations, over the internet, or via a toll free number. Once Customer has purchased the dialer, if he chooses to purchase service using a credit card, he must either go to a web site or call a toll free number to register the dialer and select his desired calling plan. If Customer chooses to pay cash for his service, he must purchase the calling plan at a retail location, then either go to a web site or call a toll free number to register the dialer and the calling plan.

For continuing service, Customer can either purchase a plan at a retail location or have his credit card automatically charged for the next period of service.

If Customers credit card cannot be authorized for the appropriate amount, the system will try an additional four times to authorize the account, at which time Customer's account will not be registered for use.
